Joshua Väth

Software Engineer

Marburg +4915739 462644 joshua.vaeth@yahoo.de
joshuavaeth.com

Summary

Full-Stack Software Engineer with 4 years of client-facing technical experience and a BA in Photography, bringing both engineering rigor and a designer's eye to every product he builds. Passionate about the intersection of code and craft. I approach software the same way I do art: with precision, intention, and an obsession with how things feel to the people using them.

Experience

Weebeet.io **Feb 2026 - Present**
Software Engineer

- Engineered an MCP server in TypeScript connecting the Mind Guard platform's LLM (Gemini) to the HubSpot API, enabling natural-language CRM operations via Fastify-backed tool handlers.
- Built an agentic resume-parsing and job-scraping pipeline using TypeScript, LangChain, and OpenAI, with Supabase (PostgreSQL + pgvector) for candidate storage and semantic similarity search across scraped opportunities.
- Developing a Next.js onboarding chat that collects profiles through guided conversation and surfaces best-matched job opportunities using vector similarity ranking.

Atomos GmbH **Apr 2021 - Feb 2025**
Technical Support Engineer Diez, Germany

- Provided technical support across EMEA, resolving 95% of issues on first contact, minimizing device downtime and improving response efficiency.
- Diagnosed and coordinated repairs for 1,000+ electronic devices annually, reducing service turnaround time by 30%.
- Maintained a 90%+ customer satisfaction score, delivering professional and empathetic support that strengthened client relationships.
- Implemented process improvements, leveraging deep product expertise and cross-team collaboration.

Education

Master School Institute of Technology **Feb 2025 - Feb 2026**
Software Engineering - Web Development Training Program

- Completed a 12-month, full time, extensive, hands-on immersive program, developing full-stack applications using JavaScript, React, Node.js, and SQL.
- Applies software engineering principles such as object-oriented programming (OOP), test-driven development (TDD), and version control (Git, GitHub) in real-world projects.
- Builds and deploys scalable applications using RESTful APIs, cloud services, and CI/CD pipelines, improving system performance and maintainability.

University of West London **Feb 2020 - Feb 2021**
Photography Bachelor of Arts (Hons)

Technical Skills

Programming Languages

JavaScript, TypeScript, Python

Frontend

HTML5, CSS3, Tailwind CSS, React, Next.js, React Router

Backend

Node.js, Fastify, Flask, RESTful APIs

Databases

SQLAlchemy, MySQL, PostgresSQL, Supabase, Redis, Knex.js

Tools & Infrastructure

Git, GitHub, Postman, Docker, BullMQ, Zod, pnpm

AI & Agentic Systems

LangChain, MCP (Model Contect Protocol), Vector Embeddings

Soft Skills

Creativity

Teamwork

Effective communication

Problem-solving

Languages

German
Native C2

English
Full-Working Proficiency B2
